- » Assist internal auditors by providing specialist expertise and capacity to undertake complex audits, including performance and IT audits.
- » Offer competitive fixed price quotes.

**We don't just audit business processes – we improve them!**

### For Internal Auditors

Quantum works in partnership with internal auditors to develop their audit methodologies and service delivery and to provide quality assurance advice.

The Director, Geoff White has over 30 years' experience in providing internal audit services. Over the past few years, this has included performing external quality assessment reviews of internal auditors on behalf of the Institute of Internal Auditors- Australia. The reviews have

covered a wide range of Australian companies in banking, energy, telecommunications, retailing

and other industries, as well as Australian, State and local government agencies.

Quantum also provides co-sourcing and individual audit services to supplement in-house internal auditors.

### For Government

Since 1999, Quantum has helped government agencies by providing an effective internal audit function that acts as a catalyst for continuous improvement of business processes and performance. Quantum is a pre-approved supplier of the full range of audit services under the WA Government's common user arrangement (CUA 23706).

Our consultants also assist with project management, business process design, probity advice and reviews of program delivery and grants. In-depth experience across many government agencies, commercial and not-for-profit organisations enables us to provide high quality and practical solutions.

### For Public and Private Organisations

Quantum can help establish effective governance and risk management structures and processes that give the Board and management greater assurance that risks are being effectively managed.

Quantum can provide a full internal audit function, complete specific reviews of business functions or internal controls to drive performance improvements
